

DAY-5

Date _____
Page _____

1 List all the main components you find inside a desktop PC after opening the cabinet and write a short description.

→ Whenever, I open my PC then I find major or main components in PC cabinet are

(i) Motherboard :- which is the main circuit which connects and allows communication of all parts of computer.

(ii) CPU :- It is known as the brain of a computer.

(iii) RAM :- Temporary memory used to store data.

(iv) Storage device :- stores operating system, files, software files etc..

There are other like CPU cables, connectors, cooling system etc...

2 Take a clear photo and draw a labelled diagram of each step as you disassemble a desktop PC, and organize them in a document with captions explaining what you did at each step.

2- YA

Page _____

→ As, PC is shutdown and directly opening the PC cabinet.

↓

Then, I disconnect all the internal cables which is connected to motherboard storage devices, CPU etc.

↓

After, I removing CPU part with removing screw. Then, RAM have been removed from slot.

↓

After completing that, cooling fan has removed from their mechanism.

↓

Lastly, I removed the motherboard of the computer to cabinet.

Therefore, I setup all parts again and run the computer as usual.

3 Reassemble the PC you disassembled, documenting each step with a brief explaining of what you connected or installed and why the orders matters.

As, Reassemble the PC, as reverse as we open cabinet and carefully place the motherboard at right place.

↓
(ii) Give CPU and cooling system in the cabinet perfectly.

↓
Then, installing RAM in the fixed slots.

↓
Mainly, GPU and storage disks has been kept perfectly.

↓
Hence, then connect all the cables, perfectly to the their specific place and finally, start the computer.

4 Create a checklist of safety precautions and tools needed before starting PC assembly process. and explain why each is important.

→ There are many tools which are helpful to open the cabinet like screwdriver, flat driver, wrist strap, cable ties, cleaning cloth, air blower and many more.

Safety and Precautions

- (i) Always shut down computer while opening the cabinet.
- (ii) Then remove all the power cables too.
- (iii) Handle all small parts carefully.
- (iv) Do not force any component or connector slot hardly.
- (v) Keep liquid things, food and water away from PC.
- (vi) Take the photos of cables while opening or closing the computer.
- (vii) Once you done recheck the all cables and components perfectly, then after start the PC.
