

0220 70 5225

→ இந்த மூன்று அம்சங்களும்

	HDD	SSD
Speed	Slower (80-160 mbps)	Very fast upto (500mb to 7000) mbps

HDD

SSD

Durability	less durability compare to ssd	more durability
Speed in case of open	Applications are taking time to open	while, it will make application open quickly.
Weight	Heavy in weight	lighter in weight
Capacity of storage	500 GB - 20 TB +	256 GB - 4 TB
Generally using for	Best of storing backups, videos, files much more.	use of software running, opening of software

3 Write a short explanation, describing the role of CPU, RAM and GPU in a running a game like Freefire.

→ Now here, taking example of the game Freefire,

⇒ Opening game Freefire by clicking on icon,

Now, CPU receives the command and start the game,

Now CPU pass message to ^{SSD} ~~SSD~~ ~~SSD~~

RAM will give my data which is
SSD been save or kept by game

Then, SSD will send message to RAM

RAM will open or show the game
like Maps, events, characters etc.

Whenever, game starts CPU process
the controls and coordinates with
character.

When, game ready to play, GPU starts
showing graphics to the desktop.

like maps, ground, weapons in
high or low quality.

During the match time,

CPU :- Reads the data and
controls the game

GPU :- It shows the FPS and colour
combination on the on screen
game.

RAM :- It continuously making game
ready

4

Imagine you want to upgrade your pc to run latest version of FIFA smoothly. List which hardware components you would consider upgrading and explain why for each.

→ Yes, Here I have to make latest version of pc to watch FIFA.

So, the components like CPU,

CPU, RAM, SSD, Cooling System

So, bcoz of CPU I can watch the player movement and no lagging problem.

for taking latest CPU is to watch with high graphics and full clarity of player, animations and with all frames.

Reason of cooling system is bcoz to cool the processor and RAM and to maintain the pc for long time

RAM is just bcoz it seems to use application or other side work while watching the game.

Lastly, SSD is storage needed of fast speed.

major memory which helps the pc to run

fast and gives no

or null loading process.
